

City of Karratha Public Health Plan 2022-2027

Acknowledgement of Country

Wayiba!

This Acknowledgement of Country recognises the ancient and continuing connection of the Traditional Owners to the land we live and work on; and the cultural responsibilities that arise from this connection. For thousands of years, when Aboriginal and Torres Strait Islander people visited the country of others, there would be rituals of 'welcoming to country'. Today, these rituals have a national legacy in 'Welcome to Country' and Acknowledgment of Country.

The City of Karratha acknowledges the Ngarluma people as the traditional custodians of this land (ngurra) and their deep historical and spiritual connection to country, waterways, rivers and seas within our region. The City of Karratha accepts Aboriginal people as the first inhabitants of Australia. They have lived on this land for many thousands of years and are recognised as one of the oldest living populations of the world, with unique languages and spiritual relationships. We pay respect to the Ngarluma people and their Elders; past, present and emerging.

The name 'Karratha' originates from the Aboriginal word meaning 'good country' or 'soft earth'.

About this document

This document was prepared by the City of Karratha

Acknowledgements

The City of Karratha would like to thank the people and organisations who contributed time and expertise to the development of the City of Karratha Public Health Plan. The City would also like to thank Mark Chadwick and Barbara de la Hunty for their work on the document.

Mayor's foreword

The City of Karratha Public Health Plan 2022 – 2027 recognises the specific health needs of residents and provides direction on the development and promotion of programs and services that improve community wellbeing and health.

Activating safe, healthy, and liveable communities is an integral goal of the City of Karratha, which forms part of the Strategic Community Plan 2020 – 2030.

The City of Karratha delivers a diverse range of initiatives to promote healthy residents, including walking/jogging routes, Mosquito Management Plan, environmental health inspections, fitness and wellbeing programs and a number of community events and celebrations.

The Public Health Plan will guide health-related planning, investments, events, services, environments, relationships, and programs; aimed at improving public health outcomes, contributing to the City becoming a safer and more liveable place.

Peter Long
Mayor, City of Karratha

Why prepare a Local Public Health Plan?

The conditions in which people are born, grow up, live, work, and age are influenced by factors that are the shared responsibility of all of us, including local government.

Whilst some of these factors are outside the City's control, there are many ways in which the City can make a difference, including partnering with the community, other service providers, and levels of government, to improve the health of the community, reduce the risk of illness, and increase life expectancy.

A local public health plan analyses the background information to determine the health status of the City's residents, health-related needs, and health risks which exist in the community.

It also allows the health profiles to be checked against the state and regional health profiles and for any deficiencies at the local level to be addressed.

A strategic approach is used to prioritise the community's views of what is needed together with the input from local service providers and government agencies.

By aligning with the vision for the City, this plan will achieve better public health outcomes which contribute towards the City becoming a safer and more liveable place.

Examples of strategies to implement the City's Public Health Plan

- 1.** Healthy communities for the benefit of groups of businesses in priority industry and economic sections

- 2.** Healthy investment in infrastructure, assets, services, events, and activities, to improve the amenability, liveability, and functioning of the city

- 3.** Healthy planning; Support social infrastructure initiatives

- 4.** Healthy events for youth and community diversity

- 5.** Healthy affordable housing; Support more accessible and affordable housing

- 6.** Health care services to ensure access to specialised, aged, and child health care services

- 7.** Healthy environments that protect our community and climate

- 8.** Healthy relationships and engagement with A&TSI peoples

- 9.** Health equity and support programs for vulnerable populations

Our City

The City of Karratha with a population of 23,243 people lies on the coast of the Pilbara region, 1,535km north of Perth. The City consists of five towns; Karratha, Dampier, Roebourne, Wickham and Point Samson and includes the historic village of Cossack.¹ All are surrounded by a 2.5 billion year old landscape.

Local Aboriginal people have strong historic and cultural connections to country. The Ngarluma, Yindjibarndi and Yaburara Mardudhunera people each have determined Native Title rights and interests in significant portions of land across the City. The Murujuga National Park is a culturally significant place for local Aboriginal people.

The Burrup Peninsula and Dampier Archipelago are examples of the exceptionally valuable natural and recreational assets that surround the City's residents. These assets afford substantial opportunity for recreation and tourism with ecological and cultural values.²

From a national and northern Australia perspective, Karratha is emerging as a major service centre on the west coast. Built relatively quickly off the back of major foundation resource sector projects, key infrastructure such as ports and rail, strong employment and business prospects and Government commitments to invest in creating a sustainable regional centre, the City is now a place where residents can access many of the services and facilities that contribute towards a higher standard of liveability.²

The City of Karratha is now home to a vibrant and diverse community that enjoys a level of amenity and service usually only seen in much larger metropolitan areas.

Our Vision: Australia's most liveable regional city

Liveability is interconnected with the determinants of health and underpins the priority objectives of this plan

To create safe, healthy and liveable communities

Liveability and Public Health

The City of Karratha has a vision to be the most liveable Regional City in Australia. This plan acknowledges and embraces this vision. Not only because it is desirable but because it aligns very closely to the definition of public health and the social determinants of health.

Since 2020, the City has used the results of the Annual Community Survey to identify key liveability factors considered by the community to both positively and negatively affect their perception of liveability in the City of Karratha, and to target projects and actions to improve liveability ratings, particularly for factors negatively affecting perceptions of liveability. All liveability factors being measured are set out below. Factors considered by community members to

negatively affect their perception of liveability in the 2021 Annual Community Survey are to the left. Factors considered to contribute positively to liveability are at the right end.

While these factors are being used by the City to measure liveability, many can also contribute to public health either positively or negatively. Access to Health Services is rated by the community as one of the main factors negatively affecting perceptions of liveability. Projects and actions identified to improve these ratings include continuing to fund the Medical Services Equalisation Scheme, investigating health specialist visits and preparing a Public Health Plan.

Public Health is...⁷

What does Public Health mean for you?

Public health is defined as: the wider health and wellbeing of the community; and the combination of safeguards, policies and programs designed to protect, maintain, promote, and improve the health of individuals and their communities and to prevent and reduce the incidence of illness and disability.³

Practically, it means having safe and nutritious food, walking trails and cycling paths, recreational sports facilities and open spaces such as parks, and natural areas. Safe drinking water, waste management, town planning, events and activities that bring our communities together.

Access to health services, education, employment, housing, and a sustainable future are all conditions that lead to good health. Factors associated with healthy eating, physical activity, avoiding harmful alcohol consumption, smoking and illicit drugs are also extremely important.^{3,7}

A healthy community contributes to a liveable regional city.

This plan identifies the community's priorities which are also aligned with the state government priorities, and provides a five-year action plan, to ensure the City plays its part in maintaining and improving public health.

Determinants of Health

The City cannot influence Biology and Genetics.

The City can help provide a physical environment that contributes positively to public health.

The City does not provide health services but appreciates the importance of access to health services for its residents.

The City can influence individual behaviour through the facilities and infrastructure it provides and the activities it promotes.

The City can encourage social interactions through the events it runs and supports, and programs it offers.

These contributions towards addressing the determinants of health are illustrated in this model adapted from the US Department of Human Services "Healthy People 2020".⁵

The City of Karratha has an amazing **natural environment** which encourages healthy lifestyles¹

1 million +
petroglyphs

86 parks &
open spaces

42 islands

2 national parks

400km coastline
(approx)

7 walking trails

15,882km²
land area

The built environment also contributes to public health¹

Red Earth Arts Precinct

\$1 million community
grants funding available

110 sports clubs
& associations

14,192 youth
activity participants

32% are couples
with children

27% increase in
families last decade

Our community health behaviours & risk factors⁶

To better understand our vision for liveability, and the role of public health towards meeting it, we need to also understand those specific public health barriers that are impacting on us achieving it.

The City has developed a health profile for conditions where our community's health status is worse than the state, which is summarised in this infographic.

How this Plan was developed

Comprehensive research including a review of local, region, State, national and global data was undertaken.

After the research phase, widespread community consultation was conducted with a range of stakeholders and community representatives, through workshops, one-on-one meetings, and online surveys.

This qualitative feedback and evidence-based data has informed the identification of key priorities and opportunities for the subsequent Action Plan.

Evidence gathering

Developing effective public health strategies is informed by first gathering evidence from public health related statistics,⁶ engaging with relevant stakeholders, and synthesizing the information into a clear and measurable action plan. Local and regional

demographic and health status data was collected from the following state and national sources.⁶ This information was collated into a health profile report which should be read in conjunction with this plan.

Community consultation – what did we hear?

To further the City's understanding of the public health priorities of the community, several facilitated workshops and online surveys were used to engage with a diverse range of stakeholders and community members. These included representatives of service providers, community and sporting groups, councillors, staff, and state government agencies.

The feedback from these sessions was carefully considered and directly contributed to the preparation of this Plan and the development of our **Vision of Liveability**.

The three key themes identified by stakeholders and community in our Vision of Liveability are:

A Liveable Community
A Liveable Environment
 &
Liveability for Everyone

Community Survey Findings

The community engagement responses were compiled and assessed to establish those issues which were rated as being of **high or very high** levels of importance to the respondents across all consultation strategies.

Consultation Strategy Metrics:

- 174 Community Survey Respondents
- 26 Stakeholder Workshops participants
- 13 Stakeholder face-to-face meetings

Noted variations from City populations averages: 83% of the respondents were aged 25-55 years, which is higher than the City population average of 53%. 9.5% of the respondents were Aboriginal or Torres Strait Islander, which is lower than the City population average of 13%.

The key concerns which were identified from the consultation process as being of highest importance to the respondents are summarised in the table below for their relevance and alignment with the Actions in this Public Health Plan.

Key Community Concerns

Alignments with the Action Plan

High Importance	Very High Importance	
<ul style="list-style-type: none"> • Active lifestyles • Healthy eating • Reducing obesity 	<ul style="list-style-type: none"> • Illicit drugs and Alcohol • Tobacco smoking • Safer communities & Injury prevention 	Addressing Health Risks City residents have 1.33 times the state rate of alcohol- and drug-related hospitalisations. City residents also have higher levels of smoking; injuries; early years accidental falls; crime rates; youth suicides; obese and overweight people; plus lower rates of healthy food consumption and physical activity.
<ul style="list-style-type: none"> • Seniors • Early years and Youth • Healthy living 	<ul style="list-style-type: none"> • Community vaccinations and Health screening • Mental health • Community events 	Providing Community Health Programs Encouraging participation in public health programs targeted at preventing or reducing worsening health conditions, should lead to reduced incidence of diseases and associated illnesses within the community. The City will partner with Agencies to support and promote their programs and services.
<ul style="list-style-type: none"> • Food affordability and security • Cultural awareness • Career pathways & University access • Business investment 	<ul style="list-style-type: none"> • Disability, Aged and Medical services • Job creation and retention • Housing availability and affordability • Rehabilitation and Detox services • Aboriginal services 	Related Issues of Importance to Health City residents have higher incidences of rented and overcrowded houses, as well as difficulties accessing services for people with disabilities and mental health problems. 41.5% disagreed with the statement that they have access to affordable nutritious food.

To address the determinants of health and achieve our desired public health outcomes, we choose to:

- Create a safe, healthy and liveable community
- Protect the health of our community by protecting our natural and built environment
- Provide accessible, transparent, and responsive leadership to improve health for ALL residents

Recent examples of the City's contributions to public health include:

Medical Services Equalisation Scheme

This scheme is an initiative by the City of Karratha to attract and retain general practitioners to improve access by residents to medical services within the City, and is conducted in partnership with Rio Tinto and Woodside.

Access to quality health services is key to community wellbeing.

MOU with Mawarnkarra Health Service

The City has an MoU with Mawarnkarra Health Service to provide health services including a dog health program in local communities within the jurisdiction of the City of Karratha.

These community health day events serve as an opportunity for City staff and MHS health workers to engage with communities to provide guidance and advice on health matters.

This recognition goes towards the State priority objective for supporting "Improving Aboriginal health and wellbeing."⁷

\$969,605 spent on upgrading footpaths

Council has committed substantial funding over a number of years to increase the amount of path infrastructure within the five towns located in the municipality.

The City provides a path network to enable efficient and safe passage of bicycles and pedestrians across all suburbs within the townships of Karratha, Roebourne, Wickham, Dampier, and Point Samson.

This supports the State priority of "Empowering and enabling people to live healthy lives".⁷

How does the Plan work?

Integrated Strategic Planning Framework

We believe in intergenerational integrated planning for a healthier future that fulfills our vision.

To become Australia's most liveable regional city, we need strategies for the short, medium, and long term. Our plans are integrated so that when we are working on short term projects, we are also contributing to delivering our long-term goals.

Our Strategic Community Plan 2016-2026 outlines how we will realise our vision for the life of the Plan. It states the aspirations and objectives, having regard for the current and future resource capacity and demographic trends of the region. The City's **Public Health Plan** is intentionally integrated as an informing document to ensure public health underpins and remains relevant within the City's overarching strategic planning framework.⁸

Our strategic themes

Our Community
Diverse and Balanced

Our Economy
Managed and Diversified

Our Natural and Built Environment
Thriving and Sustainable

Our Leadership
Responsive and Accountable

Our goals

To create safe, healthy, and liveable communities

To attract diverse and sustainable business and employment opportunities

To protect our natural and built environment

To provide accessible, transparent, and responsive leadership

Embedding the Plan into our operations

The Public Health Plan works to guide specific actions, projects and budgets within the organisation to achieve the goals of the Strategic Community Plan.

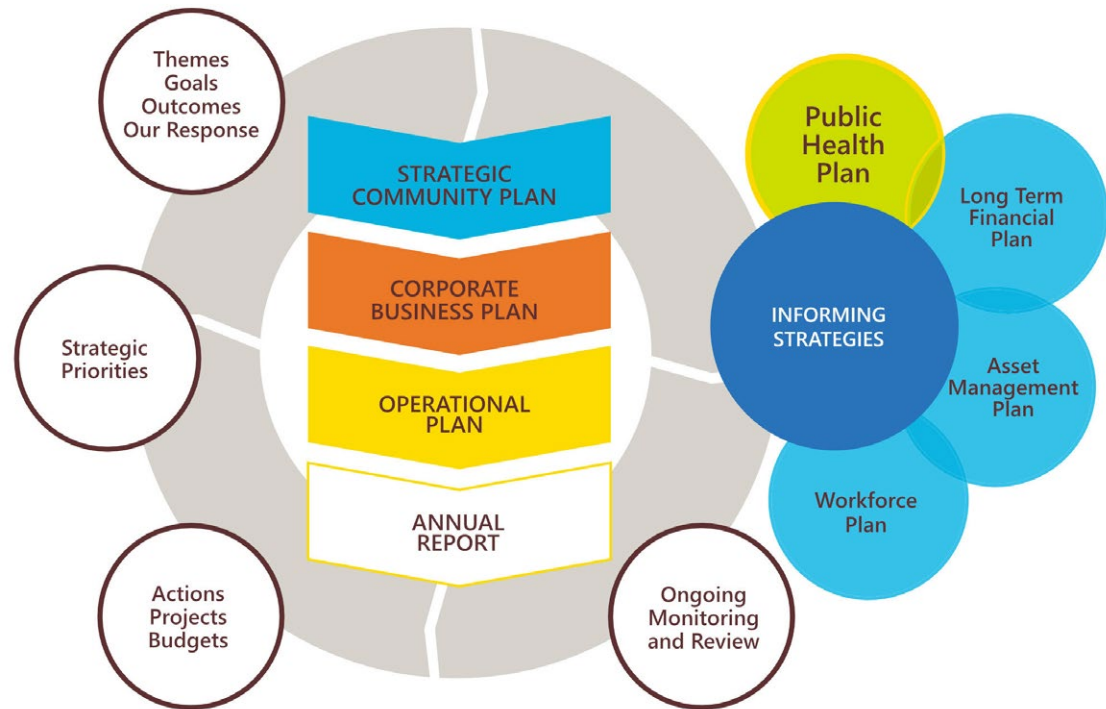

To implement the plan and achieve the desired outcomes, efforts will take into consideration the most appropriate role for the City as **lead**, **partner**, or **advocate**.

The plan features actions originating from within existing operational plans. Additionally, new actions have been identified which complement the existing plans to ensure delivery of better health outcomes for the community.

Reporting of progress and performance will be captured in the ongoing quarterly and annual reports and the strategy is continually reviewed to ensure it is up to date, relevant, and in line with state reporting requirements.

The City understands that it is one of many organisations responsible for public health, and it is well-placed to take a leadership role in initiatives that will benefit the local community. Council acknowledges that all staff across the organisation, with the CEO and Executive Management Team, can influence the public health of the City of Karratha.

Its dedicated cross-functional staff will be empowered to implement this plan and deliver its potential benefits to all residents across the City's multiple locations.

Working together

The City is committed to working collaboratively with industry, government, not-for-profit and the private sector to create improved conditions for public health. The Action Plan which follows is aligned with existing operational strategies and developed to include collaborations with other parties.

Partnerships that include tiers of government (local, state and federal) and service providers can have wide-reaching benefits to the local and regional health and are key to addressing the priorities which lead to achieving the outcomes in this plan.

The City encourages interested organisations to contact the Environmental Health team to continue to explore partnership opportunities.

Aboriginal engagement

The City of Karratha acknowledges the Ngarluma people as the traditional custodians of this land and their deep historical and spiritual connection to country, waterways, rivers and seas within the region.

Local Aboriginal organisations play an important role in the public health area and the City is has explored opportunities to work with Aboriginal organisations to promote health within the community.

The Role of the City

LEAD

The City will lead the way in delivering the actions

PARTNER

The City will partner with other agencies, organisations or groups in delivering the actions

ADVOCATE

The City will advocate for actions that enhance the health and wellbeing of the community

Public Health Plan – Actions

PRIORITY 1 – A HEALTHY & LIVEABLE COMMUNITY

Aligns with **State Public Health Plan, Objective 1:** *Empowering and enabling people to live healthy lives.*

Aligns with **Themes 1&2** in the City's **Strategic Community Plan:** *Our Community Diverse and Balanced; Our Economy Well Managed and Diversified.*

Other existing aligned strategies/plans: *Local Planning Strategy; Strategic Asset Management Plan; Shire of Roebourne Trails Master Plan; Sport, Recreation and Leisure Strategic Plan; Safer Communities Partnership Strategic Plan; Karratha Youth Development and Engagement Plan.*

Objective 1: To create safe, healthy, and liveable communities

Our Public Health Priority Strategies.

These strategies and actions aim to address significant statistical differences between the State and the City's health profile and have been carefully considered when developing this plan. These include:

- **Community Engagement to improve public health outcomes**

The City has developed numerous plans and services through engaging with its community, including in the development of this plan.

The participation of the community relies on providing citizens with good opportunities to be informed and involved in decision making to ensure success in implementation.

- **Health-related programs & information**

Information is often the key to ensuring appropriate awareness and understanding of potential health risks. The City is positioned to provide effective messages that can provide better informed residents and encourage involvement in programs and events that provide health benefits, such as healthy eating and exercise and mental health and wellbeing opportunities.

- **Reduce the impacts of smoking, alcohol & drugs on public health**

Behaviours associated with smoking, harmful use of alcohol and illicit drugs or the misuse of pharmaceuticals, can have obvious damaging impacts on health, both in the short and long term. Such diseases as cancer, brain dysfunction, heart disease, stroke, cancers, violence and injuries are some of the conditions which can be avoided by reducing harmful behaviours.

- **Health protection through surveillance and education**

The City is responsible, in partnership with the State for the administration of legislation pertaining to public health, this includes matters concerning food safety, onsite waste water treatment and disposal, drinking and recreational waters, pesticides, public buildings and various other matters, which left unchecked can expose the community to harm.

Lead – Partner – Advocate

Public Health Plan – Actions

PRIORITY 1 – A HEALTHY & LIVEABLE COMMUNITY				
Strategies	Actions	Health Risk	City's Role	Performance Measures
Community Engagement to improve public health outcomes	Implement the City's Youth Services Strategic Plan	Mental health / social wellbeing	Lead	Number of planned actions implemented annually
	Implement the Arts Development and Events Plan	Mental health / social wellbeing	Lead	Number of events and activities implemented annually
	Continue to provide accessible and equitable services (Youth centres)	Mental health / social wellbeing	Lead	Number of visitors to Youth Centres per year
	Deliver events, advertising, programs and workshops specific to issues identified by Youth Engagement Pilbara (e.g., bullying, mental health and One Punch campaign), Mindful in May, RU OK Day	Mental health / social wellbeing	Partner	Number of events, programs, workshops delivered per year
	Promote A&TSI health and wellbeing in communities	All	Partner	Number of initiatives promoting A&TSI health & wellbeing
Health-related programs & information	Provide information to the community on the main public health risks and ways to minimise them	All	Advocate	Number of information-sharing platforms used & the topics covered
	Implement the Future Clubs Program and Annual Junior Sports Expo	Lack of exercise	Lead	Participation rates of children in sports
	Promote food variety in City venues – following the traffic light system	Mental health	Lead	Number of City venues reviewed against traffic light system
	Investigate affordable healthy eating programs, workshops and financial incentives (i.e. reduced permit fees) e.g. Live Lighter, 2 & 5 and promote healthy foods at restaurants, schools and food markets	Diet Obesity	Partner	

Public Health Plan – Actions

PRIORITY 1 – A HEALTHY & LIVEABLE COMMUNITY				
Strategies	Actions	Health Risk	City's Role	Performance Measures
	Response and recovery from public health State of Emergency events	All	Partner	Effect of measures introduced on community impact from the event
	Promote and support vaccination programs	Disease Illness	Advocate	Rate of vaccinations
	Promote and support headlice programs	Not a public health risk	Advocate	
	Facilitate first aid, mental health and illicit drugs training course availability	Injury / Mental health / Suicide / Physical harm / Overdose / Death	Advocate	Number of people trained
Reduce the impacts of smoking, alcohol & drugs on public health	Implement the no smoking in language signage program	Heart & lung disease	Partner	Number of no smoking signs in language installed
	Promote an alcohol-responsible City	Alcohol-related social and health issues (Disease/cancer/mental health/violence)	Partner	Number of campaigns conducted
	Develop a smoke-free position statement	Heart & lung disease	Partner	A smoke-free position statement
	Promote City events as smoke-free	Heart & lung disease	Lead	Number of smoke-free events per year
	Include alcohol-free events in City events program	Mental health / Social wellbeing	Lead	Number of alcohol-free events per year
	Promote responsible disposal of needles	Mental health / Suicide / Physical harm / Overdose	Partner	Number of reported needles found in public areas

Public Health Plan – Actions

PRIORITY 1 – A HEALTHY & LIVEABLE COMMUNITY				
Strategies	Actions	Health Risk	City's Role	Performance Measures
Health protection through surveillance and education	Conduct surveillance of food businesses to ensure food safety standards are maintained	Illness	Lead	Reported cases of food-related illnesses
	Monitor drinking water quality of non-scheme water supplies	Disease	Lead	Water quality readings
	Conduct surveillance on public buildings, accommodation, and air quality	Illness	Lead	Percent Compliant
	Conduct surveillance of public swimming pools for microbiological risks	Illness	Lead	Water quality readings
	Implement a Mosquito Management Plan to reduce exposure to mosquito borne diseases	Disease	Lead	Reported cases of mosquito-borne disease
	Enforce legislative requirements as per the <i>Public Health Act</i> and <i>Environmental Protection Act</i> , Regulations and Local Laws		Lead	Number of complaints responded to
	Investigate notifiable disease cases and determine appropriate prevention strategies	Disease	Partner	Number of notifiable diseases investigated
	Implement private swimming pool inspection program	Drowning	Lead	Number of private swimming pools inspected that require re-inspection
	Improve monitoring, compliance with, and education on new environmental health legislation introduced under the <i>Public Health Act 2016</i>	All	Partner	

Public Health Plan – Actions

PRIORITY 2 – A HEALTHY & LIVEABLE ENVIRONMENT

Aligns with **State Public Health Plan, Objective 2:** *Providing health protection for the community.*

Aligns with **Theme 3** in the City's **Strategic Community Plan:** *Our Natural and Built Environment.*

Other existing aligned strategies/plans: *Local Planning Strategy; Shire of Roebourne Trails Master Plan; Sport, Recreation and Leisure Strategic Plan; Safer Communities Partnership Strategic Plan; Karratha Youth Development and Engagement Plan; ATSI Engagement Strategy; 2020/21 Operational Plan; Foreshore plans; Environmental Strategy; Water Management Strategy; Coastal Hazard Risk Management Plan; Local Biodiversity Plan; Coastal Management Strategy; Economic Development Strategy.*

Objective 2: To protect the health of our community through protecting the natural, built, and social environment.

Our Public Health Priority Strategies.

The strategies and actions that follow, aim to address significant statistical differences between the State and the City's health profile and have been carefully considered when developing this plan. These include:

- **Planning for healthy environments**

Healthy environments don't usually just happen. By ensuring the City considers all aspects of what makes an environment conducive to healthy living, it identifies those conditions most relevant and has incorporated these findings to developing its various facilities, infrastructure, and public spaces.

- **Promoting an active lifestyle**

Planning for and developing healthy natural and built environments is not enough on its own to motivate people into living an active lifestyle. The City maintains areas for increased activity and ensures it meets relevant standards and promotes its use.

- **Activating public spaces**

The City activates its public spaces by ensuring areas are protected and well maintained but also accessible for residents to stage their own events and improve appeal to all users.

- **Providing facilities that encourage a healthy lifestyle**

Specific facilities within the City have been identified for improvements and upgrades.

These facilities have high levels of use and are key to increasing levels of physical activity and social interaction within the City now and well into the future.

Lead – Partner – Advocate

Public Health Plan – Actions

PRIORITY 2 – A HEALTHY & LIVEABLE ENVIRONMENT				
Strategies	Actions	Health Risk	City's Role	Performance Measures
Planning for healthy environments	Planning and subdivision design that encourages walking and cycling to local parks and community facilities	Lack of exercise / Obesity / Mental health	Partner	Parks within 400m of all residential properties
	Maintain and implement Community Facilities Plans	Lack of exercise / Obesity	Lead	Expenditure on upgrading recreational facilities, sports grounds and parks
	Plan for the development of appropriate, new, and improved education infrastructure throughout the district	Liveability of regional communities	Advocate	Results from ABS census in relation to the proportion of the population in the 16 – 20 age group
	Progress Roebourne facility planning in line with Roebourne Facilities & Services Action Plan	Mental health / Social wellbeing	Lead	Actions implemented
Promoting an active lifestyle	Maintain existing footpaths to an acceptable standard	Lack of exercise / Obesity / Mental health	Lead	Performance on footpaths & cycleways from Annual Community Survey
	Implement 10-year Footpath Construction Program	Lack of exercise / Obesity / Mental health	Lead	Annual progress report
	Activate walking and jogging routes	Lack of exercise / Obesity / Mental health	Lead	Signage & lighting installed on walking & jogging routes
	Develop a tracks and trails strategic plan which considers management of existing trails and identifies new trail opportunities	Lack of exercise / Obesity / Mental health	Lead	Performance on tracks & trails from Annual Community Survey
	Promote walking, cycling and using City recreational facilities, sports grounds and parks	Lack of exercise / Obesity / Mental health	Advocate	How much are walking & cycling routes and City recreational facilities, sports grounds and parks used? (Bookings data & observation)

Public Health Plan – Actions

PRIORITY 2 – A HEALTHY & LIVEABLE ENVIRONMENT				
Strategies	Actions	Health Risk	City's Role	Performance Measures
Activating public spaces	Install shaded areas for children, families and seniors in all public parks and gardens	Skin cancer / Heat stress / Mental health	Lead	Performance on parks, gardens & open spaces from Annual Community Survey
	Activate the undercover area in Hampton Pavilion	Mental health / Social wellbeing	Lead	Performance on sense of community from Annual Community Survey
	Stage events in public open spaces, focused on activating foreshores and parks/ovals e.g. FeNaCING festival	Mental health / Social wellbeing	Lead	Performance on sense of community from Annual Community Survey
	Implement scheduled capital and maintenance works at all City-managed ovals	Lack of exercise / Obesity	Lead	Expenditure on upgrading recreational facilities, sports grounds and parks
	Develop and implement grants for projects that promote the activation of public open spaces and neighbourhood activities and events	Mental health / Social wellbeing	Partner	Performance on sense of community from Annual Community Survey
	Implement playground replacement program and install play centre equipment	Lack of exercise / Obesity	Lead	Expenditure on upgrading recreational facilities, sports grounds and parks
Providing facilities that encourage a healthy lifestyle	Implement scheduled capital and maintenance works at Wickham Aquatic Centre, Roebourne Aquatic Centre, Karratha Leisure Centre, Wickham Recreation Precinct, Pegs Creek and Dampier Pavilions, Dampier Community Hub, Karratha Youth Hub and Karratha Golf Course	Lack of exercise / Obesity / Mental health	Lead	Expenditure on upgrading recreational facilities, sports grounds and parks

Public Health Plan – Actions

PRIORITY 3 – ACCESSIBLE HEALTH SERVICES

Aligns with **State Public Health Plan, Objective 3:** *Improving Aboriginal health and wellbeing.*

Aligns with **Theme 3** in the City's **Strategic Community Plan:** *Our Leadership Responsive and Accountable.*

Other existing aligned strategies/plans: *Local Planning Strategy; Strategic Asset Management Plan; Sport, Recreation and Leisure Strategic Plan; Karratha Youth Development and Engagement Plan Reconciliation Action Plan (under development)*

Objective 2: To promote community access to health services.

Our Public Health Priority Strategies.

The strategies and actions that follow, aim to address significant statistical differences between the State and the City's health profile and have been carefully considered when developing this plan. These include:

- **Reduce the negative effects a lack of housing can have on mental health**

Having access to appropriate and affordable housing is essential for maintaining public health through physical safety, sanitation, social family space, safe food storage and preparation, sleeping environment and supports education and employment opportunities that these conditions provide. All these conditions also contribute to better mental health and wellbeing.

- **Support services that provide accessibility**

Accessibility and inclusiveness enable everyone to be able to receive the equitable services that residents should all be entitled. This includes access to transportation, health, education, and other support services needed.

- **Aboriginal & Torres Strait Islander engagement**

A&TSI people are recognised as being one of the most disadvantaged groups in Australia. Through engaging with A&TSI people the City can ensure its efforts are aligned to relevant needs and support those needs culturally appropriately in partnership with A&TSI people.

Lead – Partner – Advocate

Public Health Plan – Actions

PRIORITY 3 – ACCESSIBLE HEALTH SERVICES				
Strategies	Actions	Health Risk	City's Role	Performance Measures
Reduce the negative effects a lack of housing can have on mental health	Advocate for partnerships and incentives to increase housing supply, transitional housing and reducing homelessness	Mental health / Social wellbeing	Advocate	Relative housing availability
	Implement the Residential Housing Investment Program	Mental health / Social wellbeing	Partner	Relative housing availability
	Implement Local Planning Strategy population and housing actions	Mental health / Social wellbeing	Lead	Relative housing availability
	Implement neighbourhood activation program	Mental health / Social wellbeing	Lead	Number of reported crime incidents
Support services that provide accessibility	Increase access to transport services between Karratha and townsites for access to health, court, GP, sporting events	Liveability for regional communities	Advocate	Performance on connectivity and public transportation from Annual Community Survey
	Medical Services Equalisation Scheme	Liveability for regional communities	Lead	Performance on Access to Health Services from Annual Community Survey
	Provision of a greater range of hospital services and procedures, to reduce the need to travel to Perth	Liveability for regional communities	Advocate	Performance on Access to Health Services from Annual Community Survey
	Better continuum of services for disability, psychologists, psychiatrists, paediatrician, detox, social and wellbeing hub, cultural education, aged care, morgue, and university needs	Liveability for regional communities	Advocate	Performance on Access to Health Services from Annual Community Survey
	Implement the Access and Inclusion Plan for all communities	Disability access	Lead	Number of actions completed

Public Health Plan – Actions

PRIORITY 3 – ACCESSIBLE HEALTH SERVICES				
Strategies	Actions	Health Risk	City's Role	Performance Measures
	Provision of local mental health services	Mental health / Social wellbeing	Partner	Relative rate of mental health service provision
