

Roebourne Streetscape Master Plan Design Development Report

City of Karratha

November 2022

Introduction

The City of Karratha is seeking to increase the quality of the streetscape and urban fabric of Roebourne (Yirramagardu) for the benefit of the town and its residents.

Project Overview

The Roebourne Streetscape Master Plan proposes a vision for the long-term goal of invigorating the town centre streetscape to encourage an attractive, vibrant, and usable space.

The City's vision is to enhance Roebourne's identity by increasing the quality of the streetscapes to North West Coastal Highway, Roe Street and Sholl Street. Strengthening links to existing natural assets such as the (Ngurin) Harding River enhances amenity and provides opportunities for cultural, community voice and expression within the town.

To date, the consultant GHD Woodhead has prepared a Master Plan Concept Design Report that discusses three implementation strategies based on future outcomes, including consideration of a future Heavy Haulage Vehicle Route.

The area considered includes North West Coastal Highway from the town boundary in the east incorporating Roe Street, up to the intersection with Cherratta Road to the South. Sholl Street from North West Coastal Highway intersection up to Queen Street. While also includes Queen, Padbury, and Wellard cross streets.

A copy of the Roebourne Streetscape Master Plan Concept Design Report, including the three options considered, is provided as an Attachment.

While not directly part of the Streetscape Master Plan, the relationship of Jubilee Park with the Harding River and the combined overall effect on the town's appearance and amenity was noted as particularly influential. In response to this, the future redevelopment of Jubilee Park and access to the Harding River are potential standalone projects also emanating from Keogh Bay Report in the forthcoming years.

Addressing the critical objectives for the project, Concept Option Three has been recommended as the best long-term outcome for Roebourne as it significantly enhances the streetscape and amenity. However, given the scale, cost, and ambition of the plan, and that some elements recommended are outside of the

City's control, this option will be identified as the Roebourne Streetscape Master Plan Vision and progressively staged over time (potentially up to fifteen (15) years) and as funds are allocated.

This approach enables immediate works to progress, being mindful of the long-term aim while responding to significant future developments, including the associated RAV network considerations, which may impact the design. In July 2022, the City of Karratha Councillors endorsed a staged strategy to see this vision implemented, with the first staged to be designed and constructed in the 2022/ 23 Financial Year.

Phase 1,2 and 3 extent of works

Artist impression of Roe and Padbury street intersection

PHASE ONE CONSTRUCTION 2022/2023

- Phase One includes the below works:
- 1. Introduction of new new pavement, trees, planting, and seating
 - 2. Improve pedestrian safety
 - 3. Provide/indicate art and community interpretation opportunities
 - 4. Initial tree planting to be designed with future design changes and opportunities
 - 5. Initial pedestrian movements and paths to be designed with future design changes and opportunities

PHASE TWO CONSTRUCTION 2024/2025

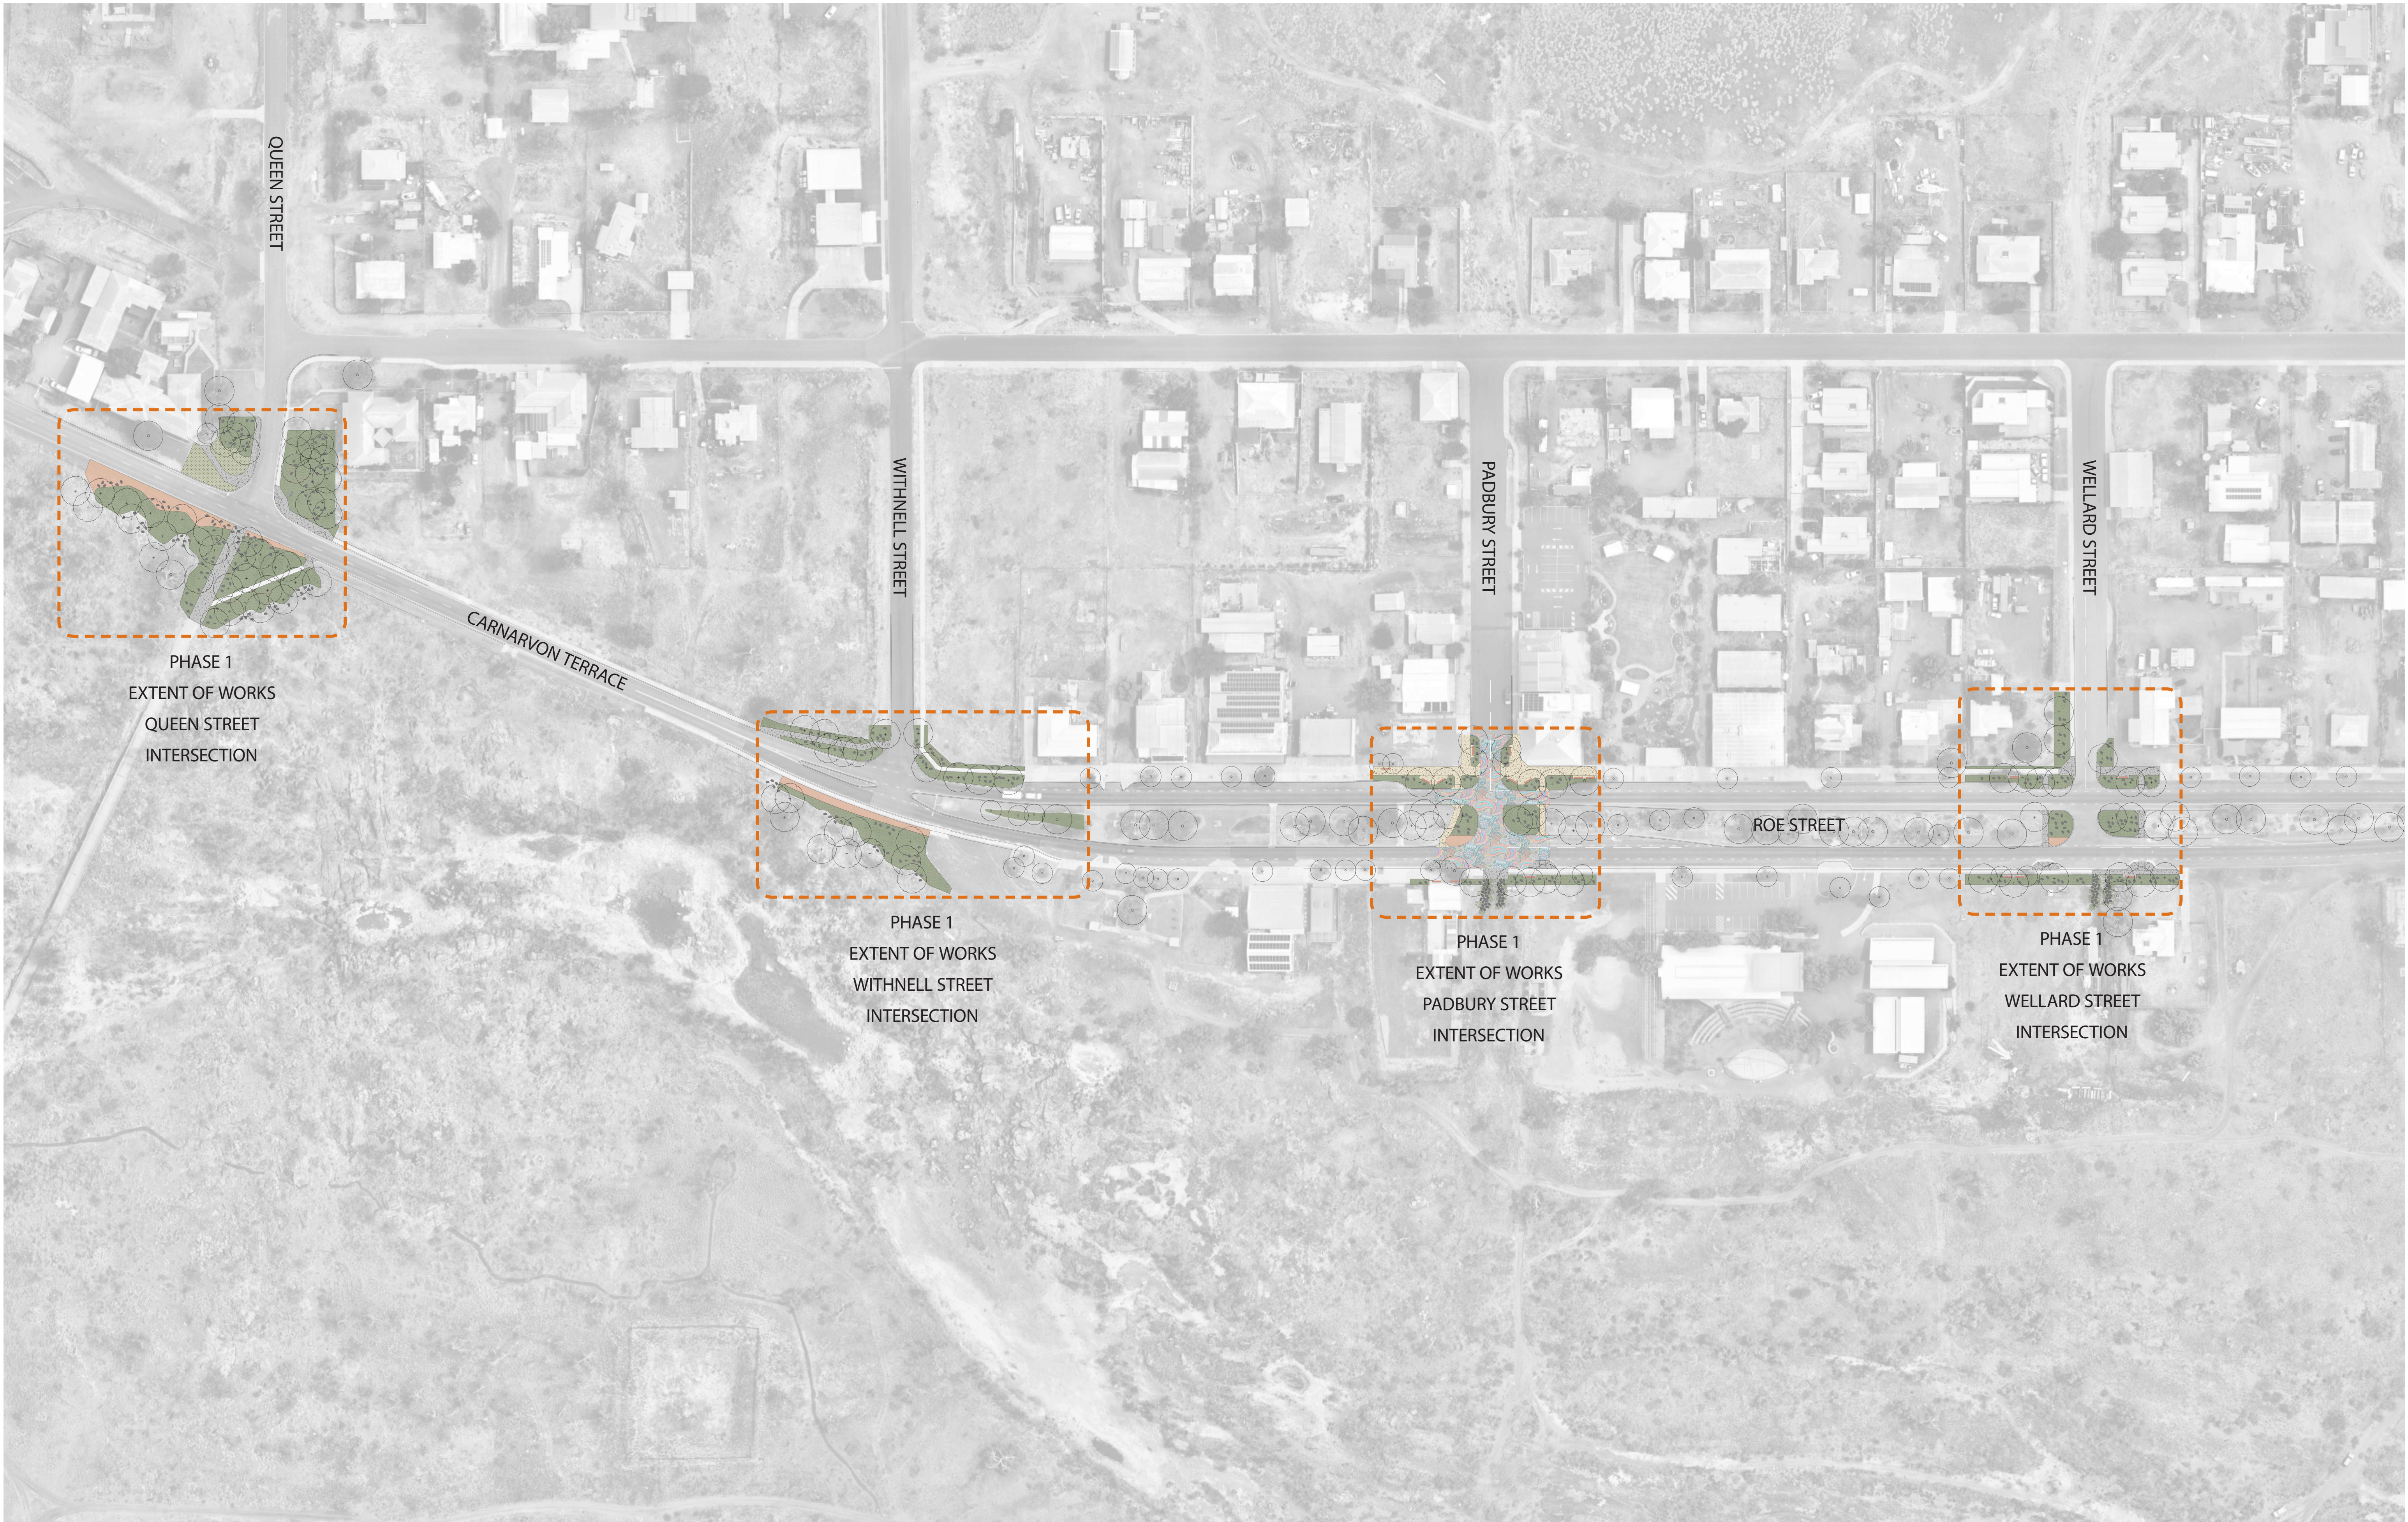

- Phase Two includes the below works:
- 1. Activate the area between Jubilee Park and the Yinjaa Barni Art Centre, Old Shire Office, and General Store
 - 2. Providing (partial) shade structures to complement existing and future uses
 - 3. Realise and indicate signage opportunities with First Nation and traditional name
 - 4. Continue with infill areas of pavement, trees, planting, and seating

PHASE THREE CONSTRUCTION 2026/2027

- Phase Three includes the below works:
- 1. Assuming the RAV Heavy Haulage Route has been implemented
 - 2. Kerb line realignment to develop the main street design
 - 3. Central island median landscaping infill
 - 4. New angled parking bays, with long vehicle parking off Roe Street
 - 5. Additional shade structures to complement existing and future uses
 - 6. Further infill areas of pavement, trees, planting and seating
